The Pet Owners Parliament

www.PetParliament.com

This year thousands of dogs will be born in squalid conditions here or in puppy farms in Eastern Europe and the Far East. Many will reach the sub-standard pet shops and unregulated animal markets right here in Kuwait. Many more will die en route, or shortly after arrival.

This year many animals will be tortured, neglected and killed all over the world by animal abusers who will get away with their crimes. There are no enforced laws to protect animals in Kuwait.

This year pets will be born to live out short, painful lives, crippled by health problems deliberately bred into them or by continued, uncontrolled breeding, passing on life-threatening genetic conditions.

This year YOU get a chance to change things through The Pet Owners Parliament - a positive voice for pets and their owners.
